

EMERGENCY SOLAR POWER SUPPLY

Charges all your mobile applications like mobile phones, GPS receivers, MP3-Players, AA+AAA rechargeable batteries

Mobile power supply for Outdoors

Increase your security, comfort and fun with this independent power supply for your mobile equipment, gadgets and gear.

30 hours emergency torch and light by 2 power LED.

Rechargeable by solar panels, USB-port, dynamo, ACDC or car battery.

1500 mAh @ 3.7V Li-Ion rechargeable battery with battery-protection circuit.

Up to 8 interchangeable solar panels. Each solar panel indicates the charging status with a LED and generates up to 100mA @ max. 9V.

Robust, splashwater resistant design of all components.

The Microsport PowerPACK is the most complete mobile powersupply in the market.

The high capacity 1500mAh Li-Ion rechargeable battery can supply power for all portable 5V electronic devices for hours.

Its small size and low weight make it a perfect standard item for each backpack.

The water and shockresistant design are ideal for outdoor and heavy usage.

The completeness of the accessories for the PowerPACK allow every user to find the perfect powersupply solution matching his individual needs and equipment. When adding a new electronic item i.e. a new digital camera or satellite phone to your equipment, simply check out the accessories in order to optimize your PowerPACK to match the changed charging demand.

The standard package of the Microsport Solar PowerPACK consists of:

- 1500mAh PowerPack
- Solarpanel, max. Output 1W
- Outdoor Organizer
- Connectors for mobile phones
(this list is constantly updated when new popular mobile phones are sold in the market)
