 **MICROSPORT®**
YOUR PERSONAL COMPUTER

MULTIBAY - MANY TOOLS

Microsport's solution to all your current and future requests.

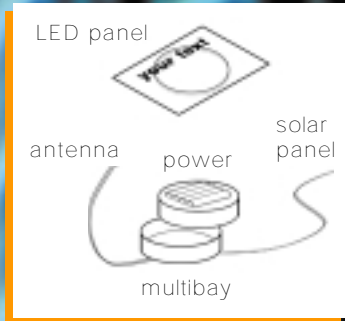

The Multibay works like a docking station. Made from flexible material with variable layout and connection wires, it can be integrated into all kind of clothing and fabric.

The embedded multibay-wires can connect to i.e. the solar panels or other integrated sensors or act as an antenna.

Many different tools can be placed into the Multibay like a power management module, a LED panel, a rechargeable flashlight, etc.

This variable layout of the multibay gives a maximum of flexibility and is future-proof for upcoming innovations in electronics.

Your own layout of the multibay guarantees highest brand recognition.

EXPRESS YOURSELF

with individual statements

LED panels of different sizes and colours allow the user to display individual messages as well as preprogrammed warnings in case of emergencies.

A small touch panel allows the user to write and design his own messages with SMS technique.

fashion

PUSH TO TALK

increase security - increase fun

The Push to Talk application is a low power 2-way radio with a range of up to 200m. It can be installed into jackets as well as helmets.

Simply push the communication button and your voice will be heard by all other users in the vicinity.

Best transmission quality with lowest power consumption due to the integrated antenna in the jacket or helmet.

Stay in touch with poor or no visible contact to your companion mountaineers - or find your lost friend in an open air concert.

communication

RECHARGE YOUR SAFETY

power management centre

A flexible PowerPack allows you to charge your mobile phones, batteries, flashlight and other mobile power consumers while away. Multiple power connectors offer connectivity to a wide range of common mobile devices.

The PowerPack can be charged either by external power supply or by modern flexible solar panels. This total independance significantly increases your safety while outdoor.

When taken out of its docking station to the fabric, the PowerPack itself works as an strong emergency flashlight.

MICROSPORT ELECTRONIC - FUNCTION - FASHION

Your innovative supplier of wearable electronics

In close contact with our customers we realize custom-made and OEM products. All steps of development, design and production can be provided by MICROSPORT. Our Headquarter in Munich, Germany controls all projects and works as an easy-to-contact interface for our customers. Additionally Microsport provides full import and export services as well as customs handling through branches in Shenzhen, China and Hong Kong.

Microsport has own development and production facilities near Munich, Germany as well as in Shenzhen, China to guarantee highest quality standards as well as competitive products.

Our team of scientists and engineers are continuously working on product improvements as well as new, innovative products. This commitment to innovation results in many patented technologies as well as award winning products for the sport- and outdoor community.
